

# ADD-ONS

**SALE**

## Now is the time to add-on!

From October 1st to December 1st, clients who purchase an Add-On will receive 13% off regular pricing.

All pricing is subject to HST.

### For businesses that want to do more.

Take your Systems 24-7 program to the next level by adding one of our additional features.

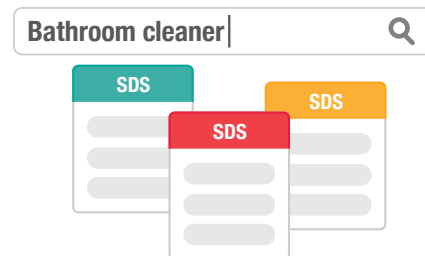

#### All-in-One – \$500/annually

The All-in-One allows your organization to group together certain tasks or training within a single page. Think of it as a virtual checklist of site resources. You can select any type of item on the system, for example, training, policies, forms, etc. All items will be placed in a list and employees must complete all requirements within a designated time period, if required. This is a great tool for things like Employee Orientation, where several items need to be completed before the employee's first shift or within their first week of training.

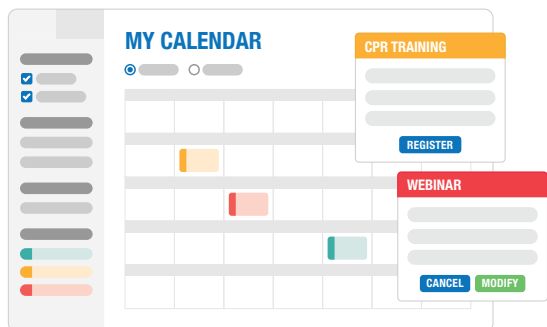

#### SDS Catalogue – \$1,250/annually

Toss out the dusty binders under the sink. Our SDS management solution provides your organization with easy-to-use inventory management and SDS deployment tools. With the SDS catalogue, employees can quickly locate the essential safety information for the regulated chemicals in your workplace and your workplace can keep an up-to-date inventory of what hazardous products can be found in the workplace.

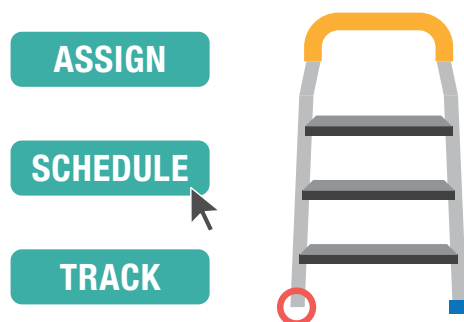

#### Event Scheduler – \$1,000/annually

Managing classroom training sessions, monthly meetings, webinars, etc. can be a challenging task. The event scheduler allows you to schedule events through the portal, control registrations, and confirm attendance. From the event scheduler, admins can print attendance sheets, upload sign-in records, track who attended and who missed it, e-mail participants, generate certificates, and report on completion. Event administrators can even create custom administrators to allow third-party providers access to confirm attendance themselves, allowing you to take a back seat when organizing and managing external training or events.

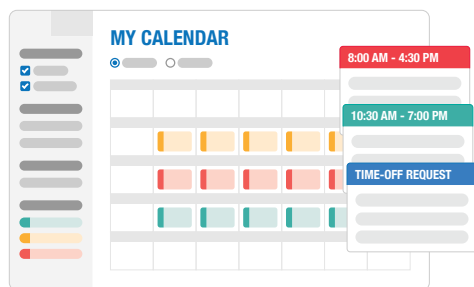

#### Preventative Maintenance – \$1,000/annually

Are you adequately maintaining the equipment and tools located in your workplace? Is it being properly documented and tracked for compliance and due diligence? This is an online program designed to assign, schedule, and track equipment maintenance in your workplace. This program allows employees to see their upcoming maintenance schedule, track what was done and notify 3rd party providers/contractors that scheduled maintenance is required. An email communication system is used to ensure maintenance requirements are not missed and escalations for resolutions/corrective actions are timely and responded to.

## Systems 24-7 Add-Ons

### Employee Scheduler – \$1,000/annually

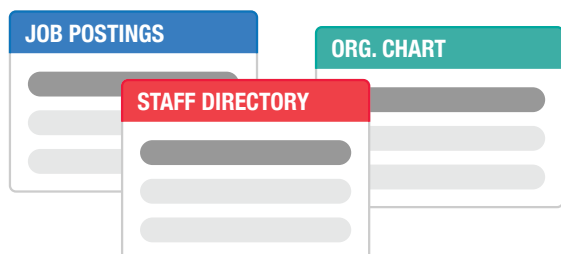

The employment scheduler allows managers to build shift schedules online. Employees will receive email notifications to remind them when a new schedule is available and provide them with a venue to request time off or vacation days. Managers can set their own parameters for approval time and easily report on the number of shifts, days off, total hours worked, and more.

### High Fives – \$500/annually

Give your employees a virtual “high-five” for good work! When an employee receives an acknowledgment or a positive review from a customer, client, fellow co-worker, or supervisor, track it online using the high five feature. Next time they log in, they will receive a round of applause and a virtual high five, displayed right on their dashboard. High fives can be an effective tool come performance review time, with easy-to-use permission-based reports for administrators to see who has achieved a high five, how many times, when and by whom.

#### WAY TO GO!

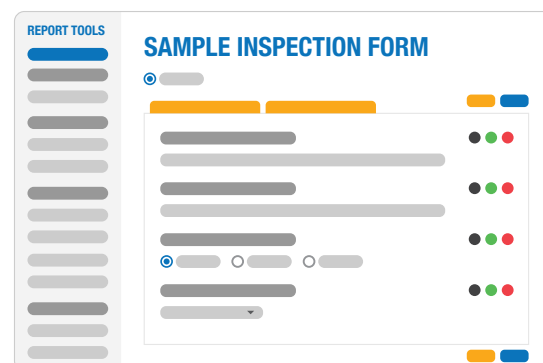

### Custom Pages – \$500/annually

Systems 24-7 wants to look and feel like your organization. Do you want to add additional pages to the site? Use them to post internal job postings, organizational charts, staff directory, etc. The uses are endless. Not every company is the same and we really want this to feel like your program so we have provided you with the additional tools to make it your own.

### Report It – starting at \$1,500/annually

Report It is an online form builder with extreme flexibility. It's easy to use, share, and track and it lives right on your Systems 24-7 platform. The best part, all the data that is collected can be reported on to track performance indicators and trends. No more gathering paperwork!

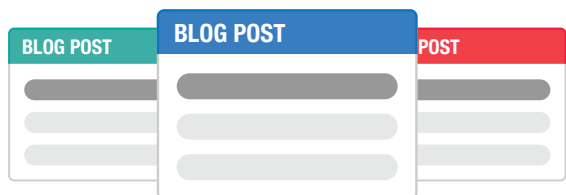

Report It gives your company the ability to create online forms and reports to track any information, such as workplace inspections, accident/incident reports, requests for accommodation, disciplinary actions and more. You can even add your own processes, where specific questions or pages are assigned to different members within your organization!

**Act today and save 13%.**

Offer valid from October 1st to December 1st.

## Systems 24-7 Add-Ons

### Blog – \$500/annually

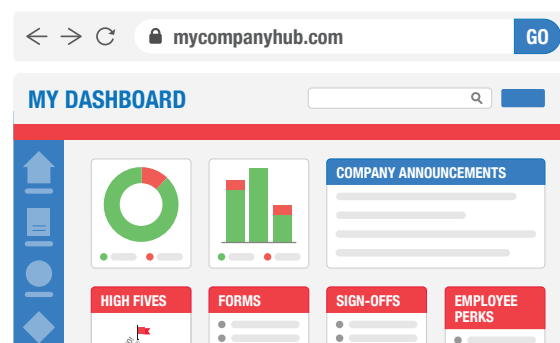

Your blog is your place to share important news and stories about your organization with the entire company. Blogs are posted on employee dashboards with our customized widget.

### Additional Domains/Themes – \$200/annually

Does your organization have multiple banners or do you operate your services in multiple languages? Systems 24-7 can allow your organization to have custom themes and domains to support this.

For example, English users can be pointed to a strictly English site and French users can be pointed to a strictly French site. Employees working in different banners of a parent company can also use a site themed and designed specifically for that banner.

At the end of the day, we want Systems 24-7 to look and feel like your organization, no matter how many divisions or banners you might have.

**Act today and save 13%.**

Offer valid from October 1st to December 1st.
